EDUCATION

Princeton University, Princeton, NJ

May 2027

Princeton University — B.S.E. Computer Science, May 2027

Relevant Design Coursework: *Animation I and II, Graphic Design: Advanced, Typography, Visual Form, Painting I, II, Ceramic Sculpture*

PROFESSIONAL EXPERIENCE

UI/UX Designer - TigerApps

August 2026 - Present

- Own end-to-end UI/UX design across TigerApps' 10+ app suite in Figma, shipping experiences adopted by 90%+ of the campus community
- Partner with product management and engineering to build a shared component and variable system in Figma, applying systems thinking and information architecture to unify visual structure across previously inconsistent apps

Software Engineering Intern - NashTech

June 2025 - August 2025

- Interview B2B insurance clients to translate evolving underwriting policies into engineering specs, enabling the team to ship compliant features on schedule
- Design wireframes and form templates in Adobe XD/Illustrator for the quote intake flow, structuring inputs for a 7-variable pricing engine and reducing data-entry errors
- Engineer ~30 flexible business rules using efficient data structures, increasing real-time quote calculation efficiency by 15%

Graphic Design Assistant - Princeton Visual Arts Department

January 2025 - Present

- Mentor 20+ students weekly on Adobe Creative Cloud workflows-from concept through print production-so students consistently deliver print-ready work on schedule
- Design posters for 15+ senior thesis shows each semester displayed campus-wide, driving an additional ~40 attendees per show

Product Designer - HoagieClub

August 2024 - Present

- Own design from ideation to execution for 4–5 shipped features (forms, scheduling, planning, Google Calendar sync), contributing to user growth from ~200 to ~2,500
- Lead development of a unified component and design system across HoagieClub's apps, replacing inconsistent styling with a cohesive visual language

Lead Graphic Designer - Entrepreneurship Design Club

August 2024 - May 2025

- Designed 12 client projects in a freelance-style model: full rebrands, brand systems, and promotional merchandise (pins, stickers, apparel) using Figma and design-system principles, earning positive client feedback
- Conducted client research through interviews to guide branding decisions, iterating concepts based on direct feedback
- Designed and organized a design competition with local businesses, managing outreach and event branding in Figma, which grew community participation

PROJECTS

B2B/SaaS - Cue (in progress)

September 2026

- Leading end-to-end design for a B2B SaaS tool replacing an outdated Google Forms/Sheets with real-time queue visibility for students and management for TAs
- Conducted student and TA interviews to map current workflows into two personas and parallel information architecture flows, prioritizing a claim system to prevent double-called students and push notifications for queue status

Product Design - Princeton Public Library

August 2026

- Self-initiated a full identity redesign grounded in 15+ resident interviews spanning four generations of users
- Reimagined logo, color, and typography systems, iterating based on community feedback to strengthen legibility and connection

UI/UX - Haven Mobile App

July 2026

- Designed end-to-end flows across 15+ screens in Figma, from ideation through a high-fidelity, component-based prototype
- Conducted 10 user interviews to inform UX decisions and information architecture

LEADERSHIP

Co-President - Asian American Student Association

August 2024 - December 2025

- Grew active membership from 150 to 300 students over 1 year, measured by event attendance, by launching new marketing and collaboration campaigns across campus orgs
- Increased event turnout to 100+ attendees per event, measured by sign-in data, by restructuring programming around core cultural nights, social events, and political advocacy

SKILLS

Design: Figma, Sketch, Adobe Photoshop, Illustrator, After Effects, InDesign, Animate, Adobe XD, Procreate, Wireframing, Prototyping, UX/UI Design, Design Systems, Branding, AI-Assisted Design Workflows

Technical: JavaScript, TypeScript, React, Node.js, Flask, PostgreSQL, HTML/CSS, Java, Python, C/C++/C#, Git, REST API Integration

Soft Skills: Cross-functional Collaboration, Client Communication, User Research, Stakeholder Management, Mentorship
