OBJECTIVE

Product designer and CS student at Princeton with hands-on experience across UI/UX, systems and component design, branding, and motion — shipping real design work for organizations ranging from student-run platforms to enterprise B2B clients. Brings research-driven thinking and technical fluency (Figma, Adobe Creative Suite, React) to translate constraints into cohesive, scalable systems.

EDUCATION

Princeton University, Princeton, NJ

May 2027

Princeton University — B.S.E. Computer Science, May 2027

Relevant Design Coursework: *Animation, Graphic Design: Advanced, Typography, Visual Form, Painting I, II, Ceramic Sculpture*

PROFESSIONAL EXPERIENCE

TigerApps - UI/UX Designer

August 2026 - Present

- Design UI/UX for TigerApps' 10+ app suite using Figma, delivering experiences adopted by over 90% of the campus community and supporting the company's expanding product portfolio
- Collaborate with product management and engineering to build a shared **component** and **variable** system in Figma, unifying visual structure across previously inconsistently styled apps

NashTech - Software Engineering Intern

June 2025 - Present

- Interviewed **B2B** insurance clients to gather requirements and translate evolving underwriting policies into engineering specifications, enabling the development team to deliver compliant features on schedule
- Designed wireframes and form templates in Adobe XD and Illustrator for the quote intake flow, structuring inputs for a pricing engine handling up to **7** variables, which streamlined the intake process and reduced data-entry errors
- Engineered **~30** flexible business rules using **efficient data structures and algorithms**, supporting weekly pricing changes and increasing real-time quote calculation efficiency by **15%**

Princeton Visual Arts Department - Graphic Design Assistant

January 2025- Present

- Mentor 20+ students weekly on Adobe Creative Cloud workflows-from concept through print production-so students consistently deliver print-ready work on schedule
- Design posters for **15+** senior thesis shows each semester displayed campus-wide, driving an additional **~40** attendees per show

HoagieClub - Product Designer

August 2024 - Present

- Shipped **4-5** frontend features spanning forms, scheduling, planning, and a calendar/transcript upload tool enabling Google Calendar sync, contributing to active user growth from **~200 to ~2,500 users** from 2024-present
- Leading development of a unified **visual/component** system across HoagieClub's apps, replacing inconsistent styling with a cohesive design language

Entrepreneurship Design Club - Graphic Designer

August 2024 - May 2025

- Designed **12** client projects in a freelance-style model: full rebrands, brand systems, and promotional merchandise (pins, stickers, apparel) using Figma and design-system principles, earning positive client feedback
- Conducted client research through interviews to guide branding decisions, iterating concepts in Figma based on direct feedback
- Designed and organized a design competition with local businesses, managing outreach and event branding in Figma, which grew community participation

PROJECTS

UI/UX- Haven Mobile App

July 2026

- Designed end-to-end flows across **15+** screens for a concert discovery and ticketing app in Figma
- Conducted **10** user interviews to inform UX decisions and information architecture
- Built a high-fidelity, component-based prototype with reusable UI patterns and responsive layouts

Product Design- Princeton Public Library

September 2026

- Self-initiated a visual identity redesign for the real Princeton Public Library, grounded in **15+** resident interviews on how the space serves **4** generations
- Reimagined the logo, color system, and typography to bridge its historic role with its modern architecture
- Iterated the logo based on community feedback to strengthen its connection to the library and improve legibility

SKILLS

Design: Figma, Sketch, Adobe Photoshop, Illustrator, After Effects, InDesign, Animate, Adobe XD, Procreate, Wireframing, Prototyping, UX/UI Design, Design Systems, Branding, AI-Assisted Design Workflows

Technical: JavaScript, TypeScript, React, Node.js, Flask, PostgreSQL, HTML/CSS, Java, Python, C/C++/C#, Git, REST API Integration

Soft Skills: Cross-functional Collaboration, Client Communication, User Research, Stakeholder Management, Mentorship
